

Building Castle Walls

Introduction – Formidable Castle

This is an exercise in aligning objects, both horizontally and vertically. This exercise is good for practicing or testing your ability to add and manipulate objects as well as the use of different camera views to help align objects.

You may want to reference the lesson [The Alice Scene Editor](#) or the [Scene Editor How to resources](#). These materials can be downloaded and printed for offline use from Alice.org

Don't forget to save your projects frequently

Castle Requirements

Start Alice and select the Grass template. Build a castle wall, using at least 8 objects in the *gate* section of the Fantasy theme of the ***Browse Gallery by Theme*** tab in the Gallery. Be sure to include a castle tower using the base, middle, and top sections of the tower. Also include a castle gate, with at least one of the doors open.
